product: Synthetic Archive

deployment: studio

deployment_version: fixture-1.0.0

source_revision: 9481055f2b20bdad6d3dc5afc68af37e1aadf687

generated_at: 2026-10-12T07:36:58.393704+00:00

platform: macOS / Chromium

capture_status: verified-synthetic

Download selected media

Prepare and download the original synthetic media to the test device.

Deployment: Synthetic Studio. macOS / Chromium.

Synthetic test fixture. These screenshots demonstrate the pipeline, not an installed Media Nexus client.

Deployment configuration

collections: True

remoteTransfer: True

workstation: Synthetic review workstation

Prerequisites

Sign in as the synthetic docs-reviewer.

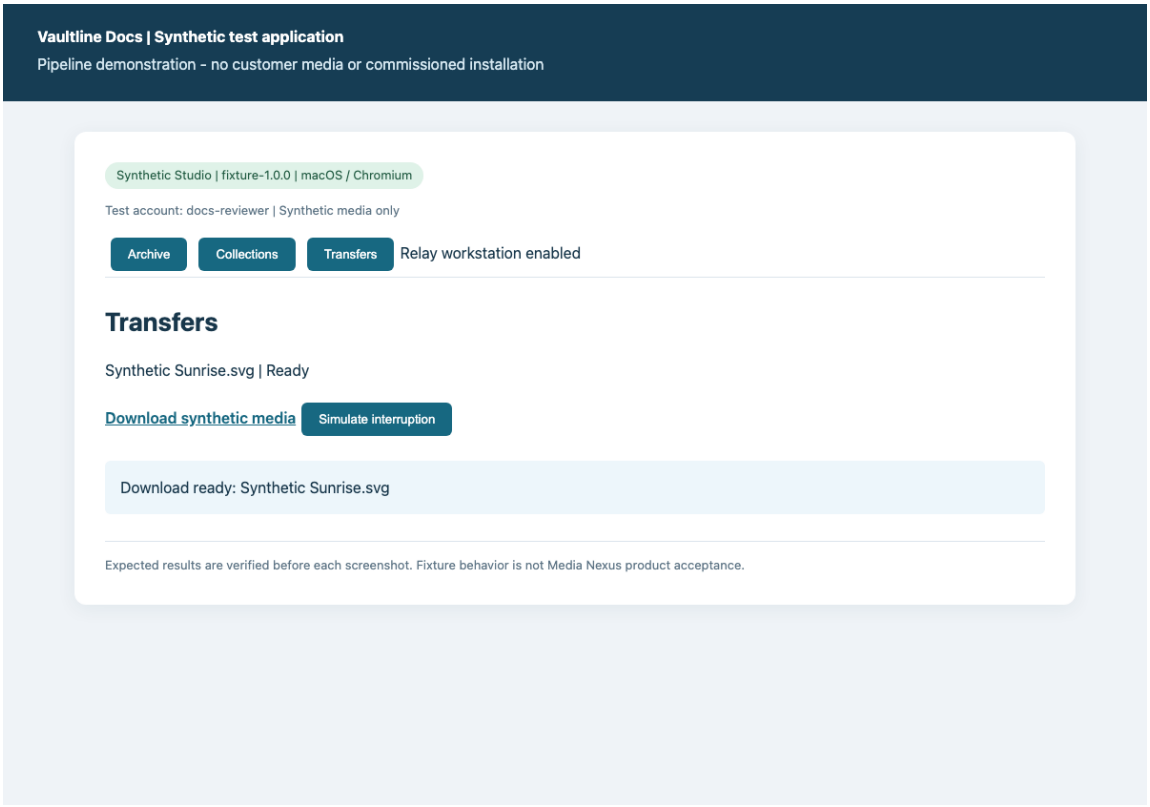

Remote download must be enabled.

Steps

1. Prepare download

Search for sunrise, select Synthetic Sunrise.svg, choose Transfer and Prepare download.

Expected: Download ready: Synthetic Sunrise.svg

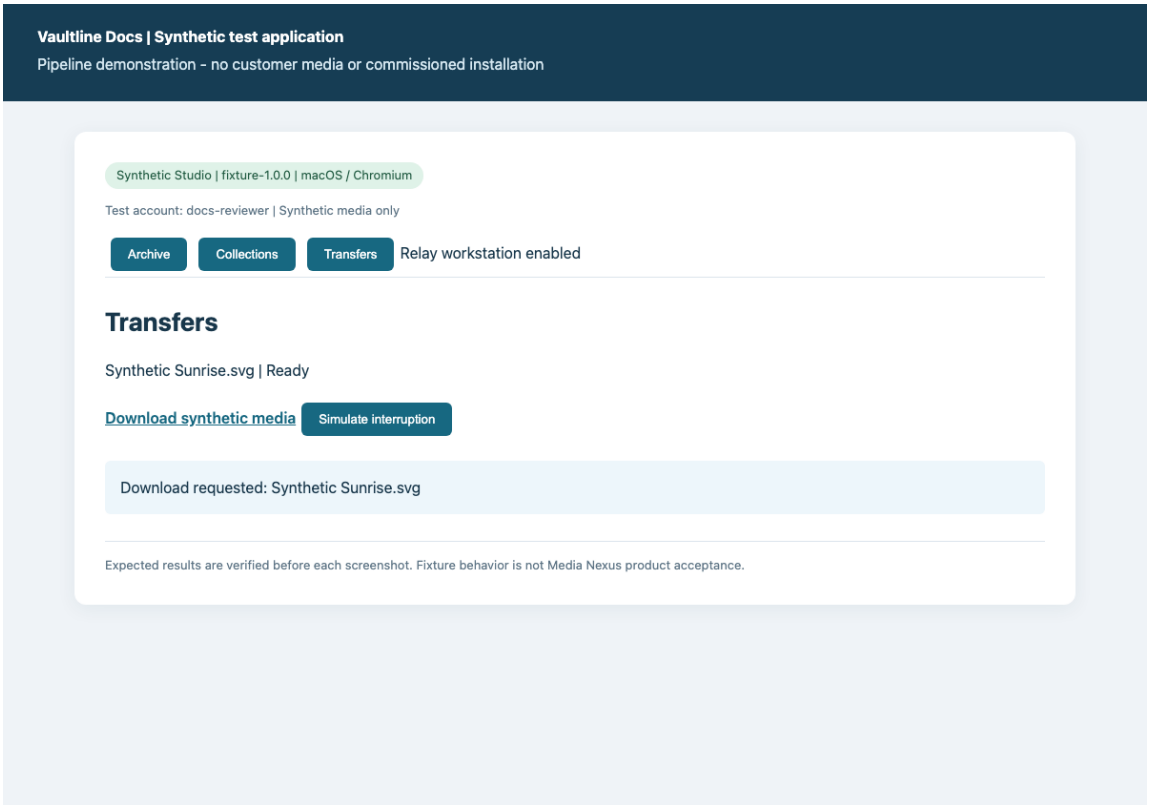

Download ready: Synthetic Sunrise.svg

2. Download synthetic media

Choose Download synthetic media. The browser saves the synthetic SVG file.

Expected: Download requested: Synthetic Sunrise.svg

Download requested: Synthetic Sunrise.svg

Expected result

The downloaded bytes match the source synthetic media hash, recorded in capture-evidence.json.

Recovery

If the transfer is Interrupted, restore the test connection and choose Resume before downloading.

Evidence and review

Screenshot verification: all documented fixture steps asserted in a fresh browser session.
