Vaultline Docs | DRAFT - review before publication

product: Synthetic Archive

deployment: archive-only

deployment_version: fixture-1.0.0

source_revision: cc32b01d98162073e6c0d0c33afdd620e5494f72

generated_at: 2026-10-12T07:36:55.274190+00:00

platform: macOS / Chromium

capture_status: verified-synthetic

Search the archive and create a collection

Find synthetic media and organize a selection without moving the original.

Deployment: Synthetic Archive Only. macOS / Chromium.

Synthetic test fixture. These screenshots demonstrate the pipeline, not an installed Media Nexus client.

Deployment configuration

collections: True

remoteTransfer: False

workstation: Synthetic archive desk

Prerequisites

Sign in with the built-in synthetic docs-reviewer account.

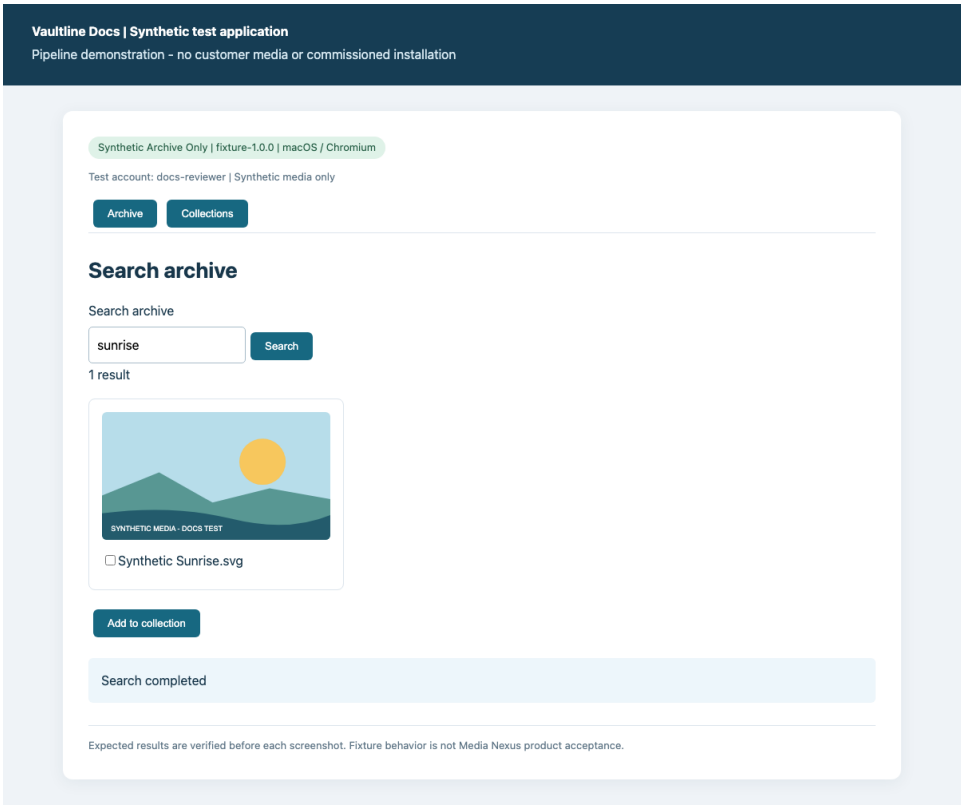

Archive and Collections must be enabled.

Steps

1. Search archive

Enter sunrise in Search archive and click Search.

Expected: 1 result

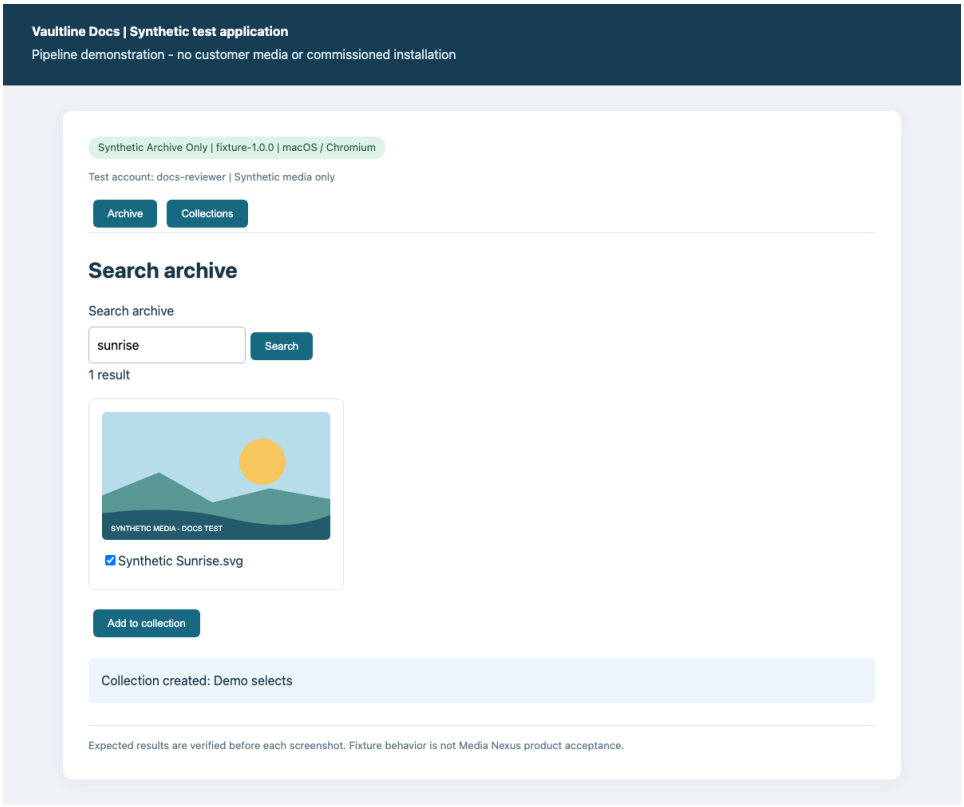

1 result

2. Create and add

Select Synthetic Sunrise.svg, choose Add to collection, enter Demo selects and choose Create and add.

Expected: Collection created: Demo selects

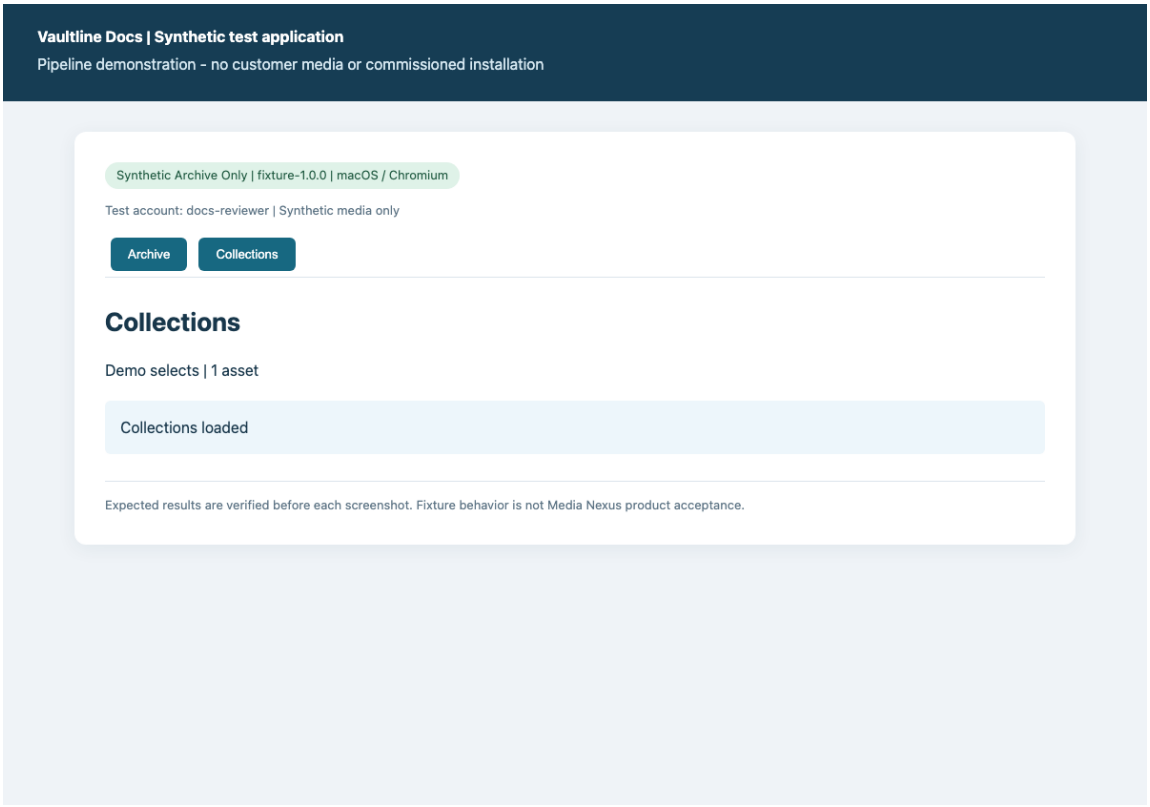

Collection created: Demo selects

3. Check the collection

Open Collections and verify Demo selects contains one asset.

Expected: Demo selects | 1 asset

Demo selects | 1 asset

Expected result

Demo selects contains the selected synthetic asset. The source media remains in the archive.

Recovery

If no result appears, check the exact search term sunrise and retry the search.

Collection creation requires a name and selected media. Select the result before creating.

Deployment notes

Use the collection prefix ARCHIVE- for this synthetic deployment.

Evidence and review

Screenshot verification: all documented fixture steps asserted in a fresh browser session.
